DID YOU KNOW—

77% of adults say they know how to handle food yet most don't know they have a one in four chance of contracting a food borne illness.¹

Keeping a constant refrigerator temperature of 40°F or below is one of the most effective ways to reduce the risk of food borne illness. Use an appliance thermometer to be sure the temperature is consistently 40°F or below. The freezer temperature should be 0°F or below.²
